

Australian Grassland Association Inc.—SYMPOSIUM

Pasture legumes for sustainable, productive systems

4–8 th July 2022 University of Western Australia, Perth

This symposium may be moved online or to another location pending COVID-19 conditions

CALL FOR PAPERS

This symposium offers the opportunity for you to present your research and interact with colleagues from around Australia who are actively engaged in lifting pasture productivity for grazing industries and mixed farming systems. We invite papers under the theme -

“Pasture legumes for sustainable, productive systems”.

Suggested sub-themes are:

- Legume and mixed pastures for changing and variable climates
- Developing new pasture legumes
- Optimising the rhizobium-legume symbiosis
- Economic value of pasture legumes in the carbon economy
- Animal production and health from grazing legumes
- Overcoming constraints to legume establishment and productivity
- Other uses of pasture legumes i.e. honey production, medicinal

Papers are invited from authors with expertise and experience within these sub-themes for all temperate and tropical pasture systems.

Papers from overseas authors and students that are relevant to the theme and sub-themes are welcomed.

Papers should identify and verify the issue or problem, demonstrate solutions and likely successes as well as stimulate debate and discussion.

For general enquiries about the symposium

ABSTRACT DEADLINE

FRIDAY 17th DECEMBER 2021

Email to bcullen@unimelb.edu.au

Abstracts will be selected for either oral presentation or a four page paper in symposium proceedings, based on quality and content. Abstracts of all papers selected will be included in the symposium proceedings. Authors of selected oral presentations will be invited to submit their manuscripts to Crop and Pasture Science to appear in a special edition. These papers will be required by **Friday 29th April** and will be subject to strict deadlines.

Abstract guidelines available at:
www.australiangrassland.org.au/publication/

When preparing your full paper please follow the Crop and Pasture Science guidelines for authors at: <http://www.publish.csiro.au/cp/forauthors>
